Confirmation Hub

on Fidectus Global Energy Network (GEN)

Unify all your OTC confirmation matching processes

Simplify, automate, and scale your trade confirmation matching with Fidectus. Free up your back office, speed up turnaround times, and reduce costs. Achieve quick success with seamless, digitised, and audit-compliant workflows across all OTC counterparties. Manage confirmations for any financial instrument or physical commodity across multiple distribution channels - electronic and PDF - all in one place.

With Fidectus Confirmation Hub, you can process, monitor, control, and match all your confirmations in one solution. Confirmation Hub ensures seamless connection with all your counterparties, allowing them to continue using email, PDFs, different formats, distribution channels, or third-party vendors. You gain the advantage of a unified solution to manage all your confirmations in one place. Implement controls such as four-eye checks and data validations to reduce manual tasks, save time, and minimise errors and risks. The solution lowers costs, ensures accuracy, and maintains compliance, all while streamlining your workflows. Confirmation Hub automates the entire trade confirmation lifecycle, optimising each step of the process.

The challenge

▶ Back offices at energy trading organisations must manually review non-electronic (e.g. PDF) trade confirmations, comparing trade details, and correcting errors.

▶ Traditional processes for electronic confirmation matching involve multiple service providers, formats, and distribution channels, creating significant burdens.

▶ Energy trading organisations experience long waiting times before trades are reconciled.

▶ Increasing exposure to compliance, regulatory, and audit obligations poses additional challenges for these organisations.

REACH ALL YOUR TRADING PARTNERS
Become independent of your counterparties' confirmation matching solutions, providers, standards, formats, and communication channels.

FASTER RECONCILIATION
Reconcile confirmations quickly with all counterparties, regardless of the commodity type (financial or physical), product complexity, signature requirements, or market.

INCREASED PRODUCTIVITY
Eliminate manual tasks like printing, scanning, emailing, and archiving. With Fidectus, you can automatically or semi-automatically check, match, and dispute confirmations with all your counterparties.

REDUCED RISK
Ensure consistent confirmation matching data across buyers, sellers, and brokers with Confirmation Hub. Achieve the highest levels of accuracy, compliance, and audit standards, while benefiting from having all your confirmation lifecycle data in one place.

Get started

Minimise operational risk and take advantage of a range of modern, ready-to-use integration options with a quick return on investment. Alternatively, you can benefit from the web application without the need for any integration.
